IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

Ronald S. Cok, et al

LIGHT PIPE WITH ALIGNMENT STRUCTURES

Serial No. 10/815,012

Filed 31 March 2004

Commissioner for Patents P.O. Box 1450 Alexandria, VA. 22313-1450

Sir:

Group Art Unit: 2874

Examiner: Akm E. Ullah

i harany centizy that this correspondence was ment by faceimile transmission to the United States Patunt and Transmark Office on the date set forth

Le bruary 14,2006

Response To Notice To File Corrected Application Papers
In response to the Notice To File Corrected Application Papers
mailed February 2, 2006, please amend the above-identified application, without
prejudice, as set forth below:

Amendments to the Specification begin on page 2 of this paper.

Remarks/Arguments begin on page 3 of this paper.

Amendments to the Specification:

Please replace the paragraph beginning on page 17, line 31 with the following rewritten paragraph:

-- The light pipes of the present invention may be manufactured by injection molding. Such molding machines are known and capable of providing the necessary precision. Specific molding processes which may be employed include those described in concurrently filed, commonly assigned, copending USSN ______(Kodak Docket No. 87893) 10/815,013, the disclosure of which is incorporated by reference herein. Suitable materials for the light pipes include plastics such as polycarbonates, acrylics including polymethylmethacrylates, fluoropolymers, cyclic olefins, polysulfones, polyethersulfones, polyetherimides, and optical nanocomposite type derivatives of the afore mentioned transparent plastics that have been modified with inorganic materials to improve the optical properties of the plastics such as higher refractive index or lower chromatic dispersion. Flat-panel displays, such as liquid crystal displays are commercially available. System and display controllers may be made using conventional integrated circuit technology. Conventional mounting and interconnection means may be used to provide signal, power, and control capabilities .--

REMARKS

In view of the foregoing amendment, it is believed the application is now complete and ready for issuance.

Respectfully submitted,

Attorney for Applicant(s) Registration No. 33,564

Andrew J. Anderson/vjr Rochester, NY 14650

Telephone: (585) 722-9662 Facsimile: (585) 477-1148

If the Examiner is unable to reach the Applicant(s) Attorney at the telephone number provided, the Examiner is requested to communicate with Eastman Kodak Company Patent Operations at

(585) 477-4656.
